

**Your safety at work,
our work**

Beyond our passion
to create technical
fabrics there is our
commitment to protect
people at work.

Santanderina is a leading European textile industry group and one of the textile benchmarks where quality and service

are concerned. Techs® is the technical division within Santanderina Group dedicated exclusively

to create and develop textiles for workwear and protectivewear.

Quality, service, flexibility and innovation in protective fabrics

1923
First stone

The González Cosío brothers build what will be the future headquarters of Textil Santanderina in Cabezón de la Sal (Cantabria).

1959
Change of course

Juan María Parés takes over the management of the textile factory, which is acquired by a Catalan business group, forming Textil Santanderina and changing the product to focus on cotton fabrics.

1970
Excitement

Open End spinning is incorporated at Textil Santanderina.

1980
New projects

Fashion is the basis of the company's knowledge. Sustainability is the goal. First wastewater treatment plant. Collaboration as a strategy. University-Business Collaboration Agreement.

1994
Building the future

Juan Parés Boj, Juan María Parés's son, takes over the business and becomes company director and future CEO. Internationalisation is the fundamental basis for the future and the cogeneration project is the basis for reliable energy.

2001
Commitment

Textil Santanderina applies to join the United Nations Global Compact.

2005
Growth

TECHS business unit foundation

2015
Solidity

The Santanderina Group is established, including the parent company and the various business units that have been growing.

2020
Responsibility

After a growth phase, the company has made a firm commitment to sustainability and responsibility towards people and respect for the environment, in line with new demands and good business management practices.

2022+
Confidence

Textil Santanderina transmits confidence through its commitment to sustainability, its teams of people, its constant modernisation, and its research and collaboration with universities, technology centres and other companies to innovate in textiles and develop new products to meet future demands.

Santanderina Group
is one of the few European
manufacturers counting
with a vertical production
process of its fabrics.
Production plants

are equipped with a
versatile and efficient

Focus on quality

A growing number of customers and consumers are concerned about the fabrics of their clothing being more ecological, more sustainable, better for their health and for the environment, and with

respectable working conditions for the workers that produce them. Santanderina fabrics are rewarded with official quality and ecological responsibility certifications.

Quality, Organization and Environment certification guide

Techs® extensive product range includes everything from basic workwear to the latest innovations using technical fibres.
